Our experience and commitment to quality workmanship, safety and management is what sets us apart from other contractors and service providers to the Industry.

## Services provided

---

### Project Supervision Services

---

Killahy Constructions offer project supervision hire to our Clients. Our trained supervisors and lead hands, help facilitate delivery of successful work packages and projects on time and on budget whilst maintaining the highest safety standards. Supervision of work is a critical aspect of successful projects that needs to be managed closely from mobilisation right through to practical completion and Killahy Constructions have significant experience in supervision of projects with a focus on safety, quality, environment and efficiency.

### Infrastructure projects

---

Completion of work packages on Infrastructure projects including recommendation and installation of project specific engineering solutions for private, local & state government funded civil infrastructure projects.

### Labour Hire

---

Killahy Constructions only supply personnel that have been vetted by our supervisors on site. Clients can be satisfied that they are getting staff that are suitable and capable for the requirements on site and will be safety compliant.

Killahy Constructions offer both short term and long term labour solutions. Construction projects can be difficult to resource and Killahy Constructions can provide the appropriate resources to meet Client's needs. Provision of trained, competent and ticketed personnel to cover all disciplines are available to service Client requirements. Some of the core trades we offer include Carpenters, Form workers, Steel fixers, Concreter's, Pipe Layers, Machine Operators and Civil and Construction Labourers.

## Mission

Killahy Constructions mission is to deliver unrivalled quality, service and value for money on all our projects throughout Australia.

We care about the long-lasting results of our work. Using only quality materials, modern equipment and best-practice techniques while collaborating with our clients, we avoid shortcuts using a tailored process based approach for each project with absolute thoroughness and attention to detail.

We're not just here to do a job. We take pride in our work and care about its holistic impact on communities and the environment. We understand and recognise the relevance all stakeholders have to a project. By acting with integrity and responsibility, we aim to leave a project with a positive legacy.

We adapt to meet the requirements of every project. By moving quickly and tailoring our service to fit challenging time-frames and adverse conditions, we deliver quality, safely in a cost and time efficient manner

Our safety commitment is a goal of zero incidents on projects and through continuous engagement with Clients and Employees, a safe and successful outcome will be delivered on every project.

## Why use Killahy Constructions

We are a capable, diligent and enthusiastic company who are continually building the company's profile and competencies while doing so ethically and safely. Our company will prevail by maintaining committed personnel, good workmanship, expanding competencies & capabilities and satisfying clients, be them large or small. We at Killahy Constructions believe that it is with this philosophy and attitude that our company will benefit you (our clients) in delivering projects in an ever-challenging industry.

## Safety Focused Labour

Killahy Constructions have extensive experience in some of the most safety conscious environments and industries, including the civil and mining and gas industries. This experience is essential to ensure the maintenance of safety policies and standards through all projects.

## Efficiency and Productivity.

Whilst staff number one priority is safety, staff are fully committed to achieving efficient and productive outcomes. Killahy Constructions staff are honest hard working individuals working as part of a team who are adaptable to the site requirements ensuring all time on site is productive thus maximising returns for Clients.

## Hiring of Staff

Killahy organise all staff to ensure the right people with necessary qualifications are allocated to projects. All staff are fully vetted on site by our supervisors and we will have personally worked with all our personnel on site. As a Client, you can be confident we will source and place qualified and capable personnel whether it be Carpenters, Form workers, Steel fixers, Concreter's, Pipe Layers, Machine Operators and Civil or Construction Labourers, Killahy Constructions manage and administer

all onboarding and induction paperwork making the process easier and eliminating administration costs for our Clients.

[www.killahyconstructions.com.au](http://www.killahyconstructions.com.au)

### West Connex M4 PRVF

Our extent of works included installing the rock bolts, stress anchors and reinforcement steel for shotcrete walls

### *Previous projects*

---

#### University of New South Wales Biomedical Science Development

On this project, we constructed a 6-sided detention tank that you can see in the picture. The tank was constructed under a new road and included a reinforced slab, core filled block wall and a sloping suspended roof

#### Porters Creek Dam

We assisted in the installation of all formwork and concrete finishing for this dam refurbishment and was also responsible for all steel reinforcement in the newly constructed spillway also.

### CMC Wyong Road Water and Sewer Relocation

We constructed the below cast in situ valve pit along a 600mm water line

### Newlands Coal Mine

Below is a photo of a wall before forming the second side in Newlands Coal Mine Where we completed all the steel works and provided personnel to complete concrete and formwork

### Googong Waste Recycling Plant

Here is an image of one of 6 structures we completed the reinforcement for on the at the Googong Waste Recycling Plant with the main ones being the Bioreactor Tank and Idea Tanks

### RMS intersection works at Boolaroo

We completed over 300Lm of footpath for the as part of this intersection upgrade.
